

GLASS CONNECTORS 7000 SERIES

7000 SERIES OF CONNECTORS

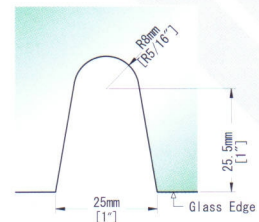

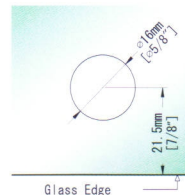

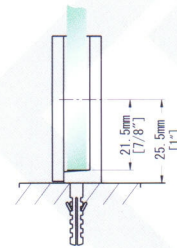

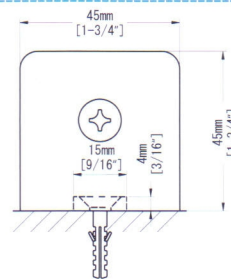

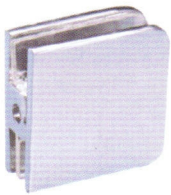

This Series of connectors are of traditional style with Straight Edges and Round Corners, include 10 different designs respectively for mounting glass to wall at 90 degree, 135 degree and 180 degree, and for clamping two glass panels that meet at 90 degree, 135 degree and 180 degree.

- **Construction:** Solid Brass
- **Holes Required.**
- **Glass thickness:** 8-10mm (5/16"-3/8")
- **Standard Scope of Supply Includes:**
Gaskets, Self Drilling Screws & Plastic Anchor Bolts for Wall Mount Clips
Extra Gaskets need to be ordered for glass thinner than 8mm (5/16")
- **Standard Finishes:** CP (Bright Chrome), BN (Brushed Nickel), SCP (Satin Chrome), BSCP (Brushed Satin Chrome), AB (Antique Brass), PB (Polished Brass), ORB (Oil Rubbed Bronze), GM (Gun Metal), TI (Titanium), PVD.

7001

Glass to Wall Clamp With One Mounting Hole

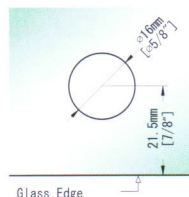

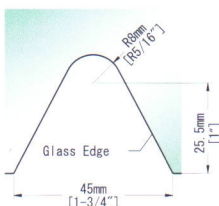

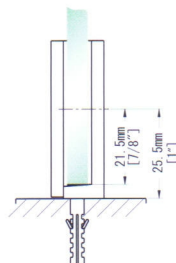

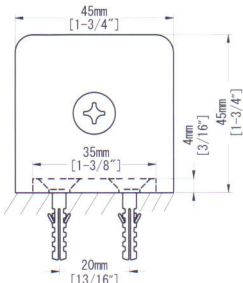

For clamping glass panels directly to the wall, ceiling or floor vertically

7002

Glass to Wall Clamp With Two Mounting Holes

For clamping glass panels directly to the wall, ceiling or floor vertically

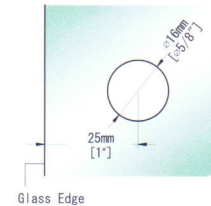

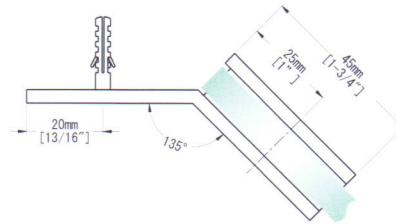

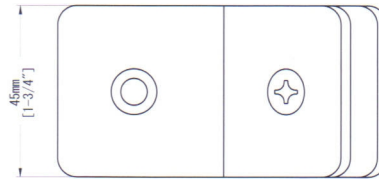

GLASS CONNECTORS 7000 SERIES

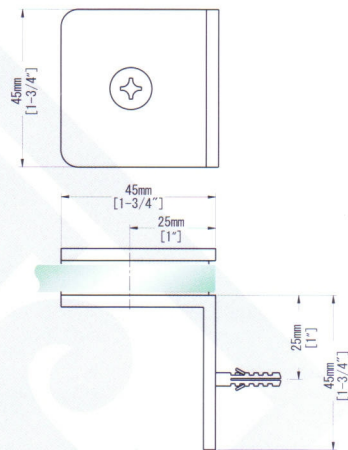

7010

135° Glass to Wall Bracket

For fixing glass indirectly to the wall, floor or ceiling at 135 deg. angle

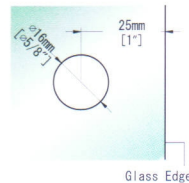

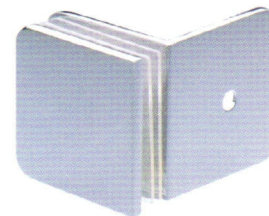

GLASS CONNECTORS
7000 SERIES

7012

90° Glass to Wall Bracket

To mount glass panels vertically to the wall, floor or ceiling

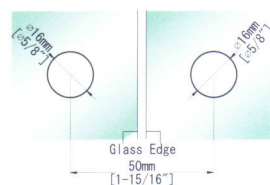

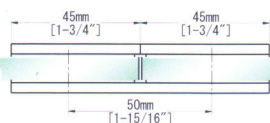

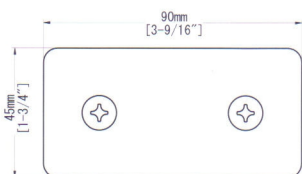

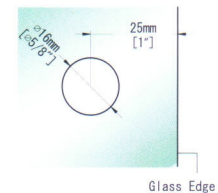

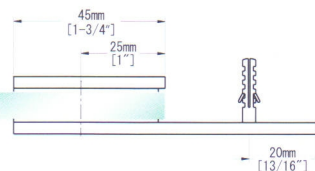

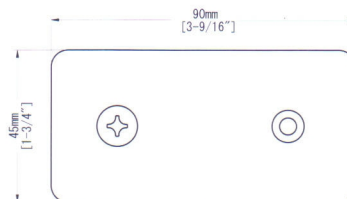

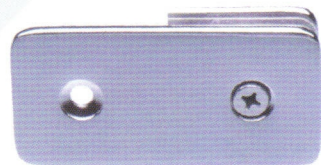

7014

180° Glass to Wall Bracket

To mount glass panels vertically to a step wall or horizontally to the top of a step.

Use as a "Y" clamp.

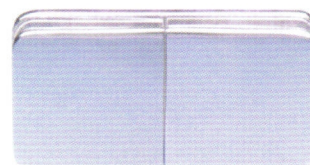

7020

180° Glass to Glass Clamp

with Split Face, to connect glass panels inline

A hole through each piece of the two glass panels prevent glass slip.

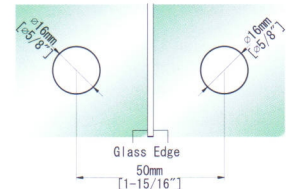

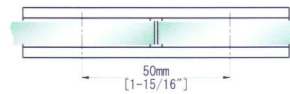

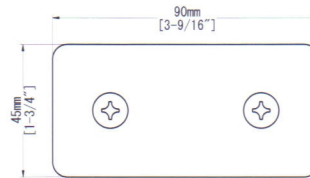

GLASS CONNECTORS 7000 SERIES

7021

180° Glass to Glass Clamp, with full plate
To connect glass panels inline

A hole through each piece of the two glass panels prevents glass slip.

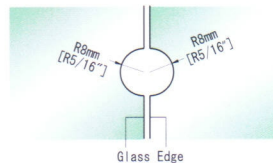

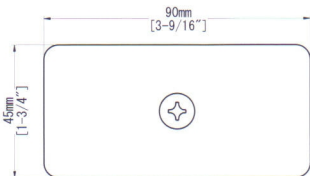

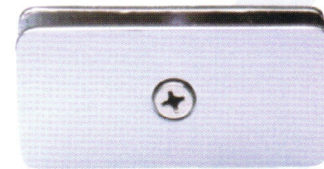

7022

180° Glass to Glass Clamp,
To connect glass panels inline.

Two glass panels can be connected inline without any cut or drill.

Optionally the glass panel can also be notched around the screw stud for a tighter gap.

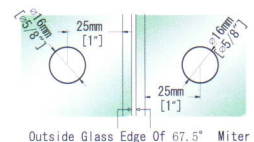

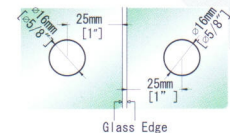

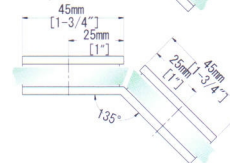

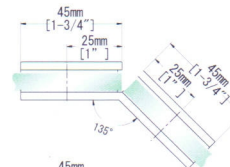

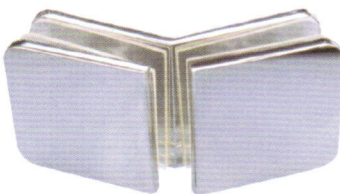

7023

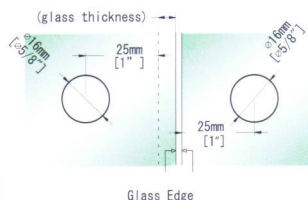

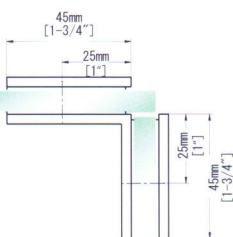

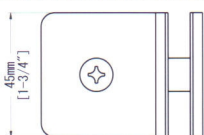

135° Glass to Glass Clamp

To connect two glass panels at 135° angle

Split face outside

Outside Glass Edge Of 67.5° Miter

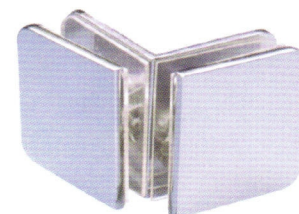

Glass Edge

7025

90° Glass to Glass Clamp

To connect two glass panels meeting at 90°
Split face outside

GLASS CONNECTORS 7030 SERIES

7030 SERIES OF CONNECTORS

This Series of connectors are designed with Curved Surfaces, while Straight at the Edges and Corners, to match the design of 700-7 series of shower door hinges with curved surfaces. This series include 6 different designs respectively for mounting glass to wall at 90 degree and 180 degree, and for clamping two glass panels that meet at 90 degree, 135 degree and 180 degree.

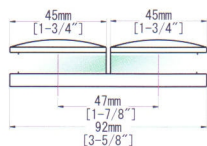

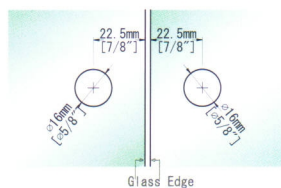

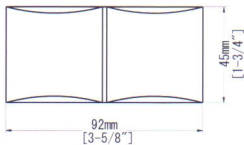

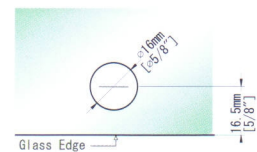

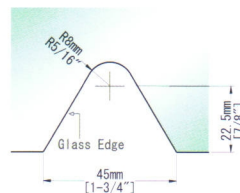

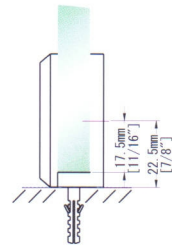

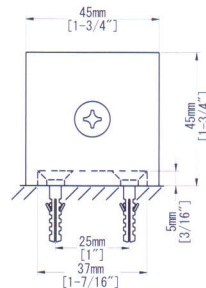

- **Construction:** Solid Brass
- **Holes Required.**
- **Glass thickness:** 8-10mm (5/16"-3/8")
- **Standard Scope of Supply Includes:**
Gaskets, Self Drilling Screws & Plastic Anchor Bolts for Wall Mount Clips
Extra Gaskets need to be ordered for glass thinner than 8mm (5/16")
- **Standard Finishes:** CP (Bright Chrome), BN (Brushed Nickel), SCP (Satin Chrome), BSCP (Brushed Satin Chrome), AB (Antique Brass), PB (Polished Brass), ORB (Oil Rubbed Bronze), GM (Gun Metal), TI (Titanium), PVD.

GLASS CONNECTORS
7030 SERIES

7030

Glass to Wall Clip

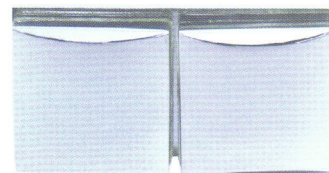

To mount glass panels vertically to the wall or ceiling.

7031

180° Glass to Glass Clamp

To connect two glass panels inline

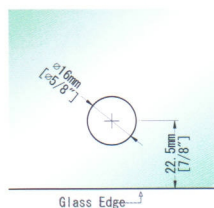

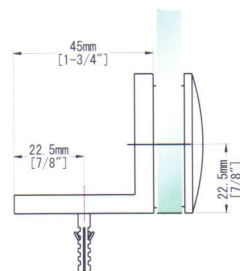

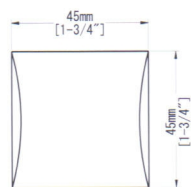

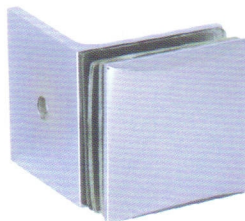

GLASS CONNECTORS 7030 SERIES

7032

90° Glass to Wall Bracket

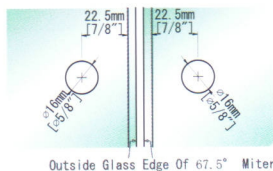

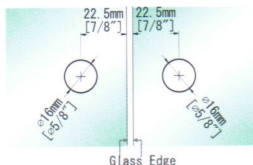

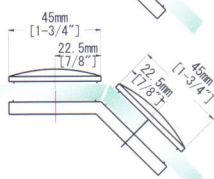

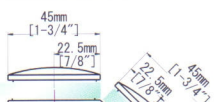

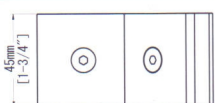

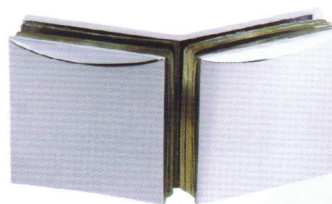

To mount glass panels vertically to the wall, floor or ceiling

7033

135° Glass to Glass Clamp

To connect two glass panels meeting at 135°

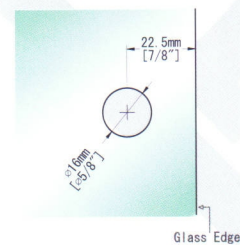

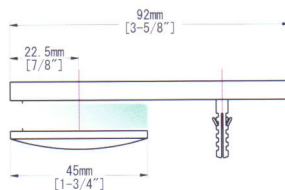

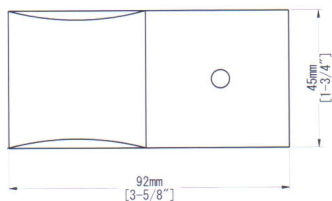

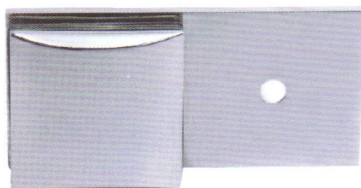

Outside Glass Edge Of 67.5° Miter

7034

180° Glass to Wall Bracket

Can be used as "Y" clamp

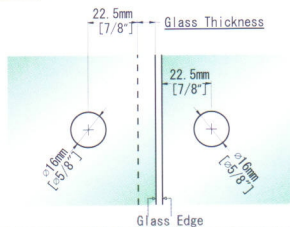

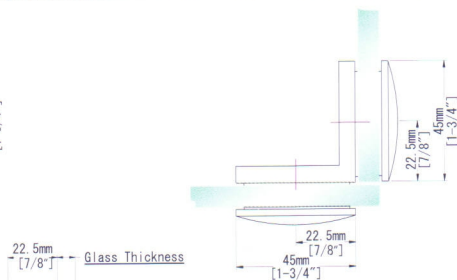

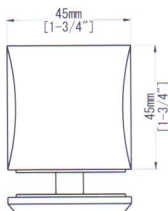

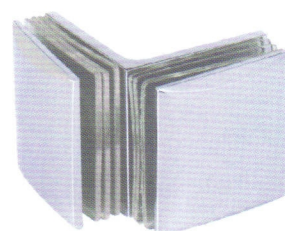

To mount glass panels vertically to a step wall or horizontally to the top of a step.

7035

90° Glass to Glass Clamp

To connect two glass panels meeting at 90°

GLASS CONNECTORS 7200 SERIES

7200 SERIES OF CONNECTORS

This Series of connectors are of square shape with Straight Edges and Straight Corners, Match Jade 700-1 series of shower door hinges.

Include 13 different designs respectively for mounting glass to wall at 90 degree, 135 degree and 180 degree, and for clamping two glass panels that meet at 90 degree, 135 degree and 180 degree.

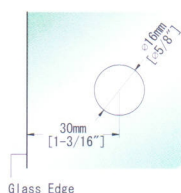

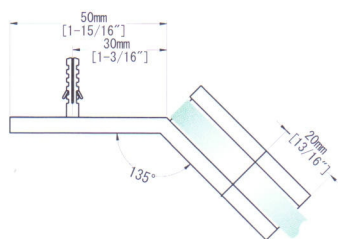

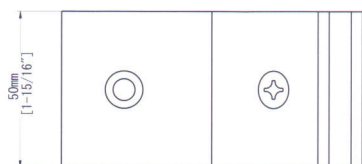

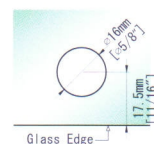

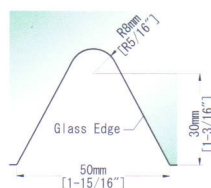

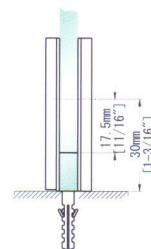

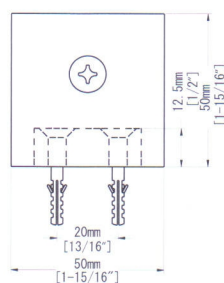

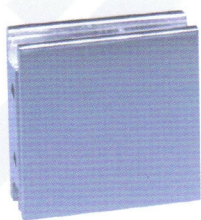

- **Construction:** Solid Brass
- **Holes Required.**
- **Glass thickness:** 8-10mm (5/16"-3/8")
- **Standard Scope of Supply Includes:**
Gaskets, Self Drilling Screws & Plastic Anchor Bolts for Wall Mount Clips
Extra Gaskets need to be ordered for glass thinner than 8mm (5/16")
- **Standard Finishes:** CP (Bright Chrome), BN (Brushed Nickel), SCP (Satin Chrome), BSCP (Brushed Satin Chrome), AB (Antique Brass), PB (Polished Brass), ORB (Oil Rubbed Bronze), GM (Gun Metal), TI (Titanium), PVD.

GLASS CONNECTORS
7200 SERIES

7202

Glass to Wall Clip, with Two Mounting Holes.

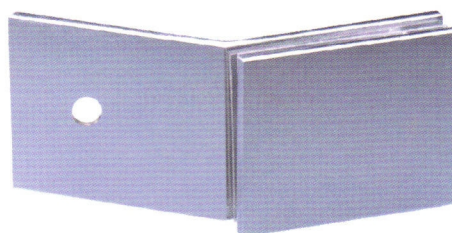

For mounting glass panel directly to the wall, ceiling or floor vertically.

7210

135° Glass to Wall Bracket

For fixing glass indirectly to the wall, floor or ceiling at 135 deg. angle

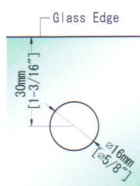

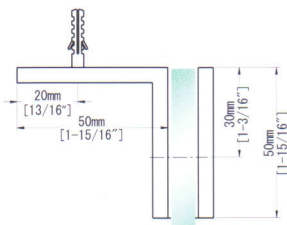

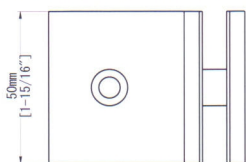

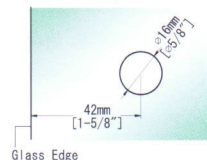

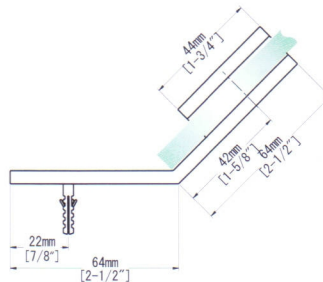

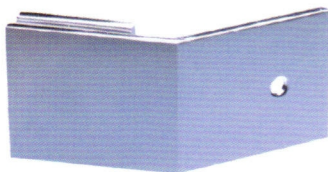

GLASS CONNECTORS 7200 SERIES

7211

135° Glass to Wall Bracket

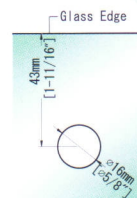

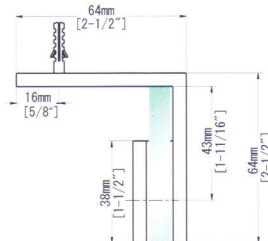

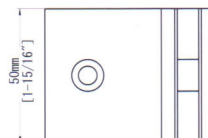

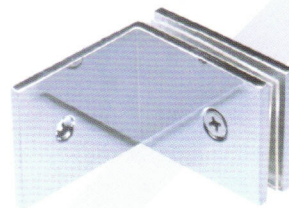

For fixing glass indirectly to the wall, floor or ceiling at 135 deg. angle

7212

90° Glass to Wall Bracket

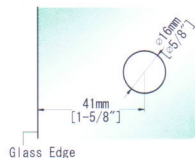

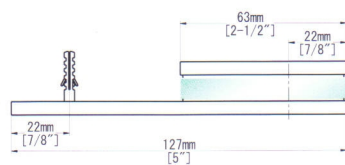

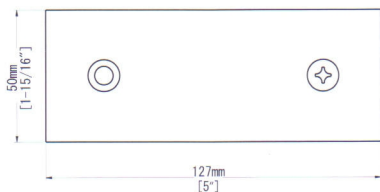

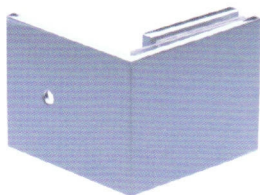

To mount glass panels vertically to the wall, floor or ceiling

7213

90° Glass to Wall Bracket

To mount glass panels vertically to the wall, floor or ceiling

7214

180° Glass to Wall Bracket

To mount glass panels vertically to a step wall or horizontally to the top of a step.

Use as a "Y" clamp.

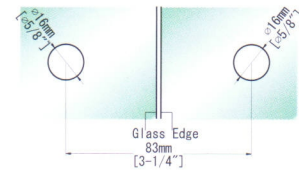

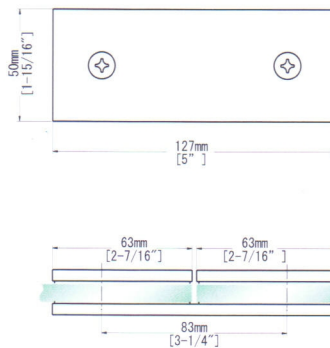

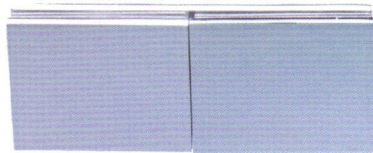

GLASS CONNECTORS 7200 SERIES

7220

180° Glass to Glass Clamp

With split face,

To connect glass panels inline.

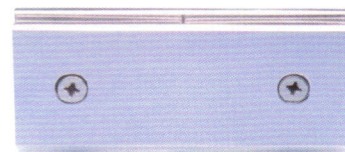

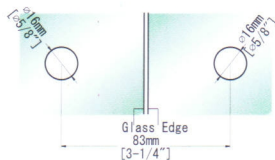

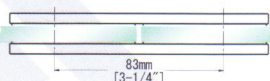

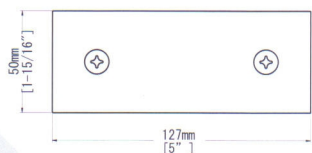

GLASS CONNECTORS
7200 SERIES

7221

180° Glass to Glass Clamp

With full plate,

To connect glass panels inline

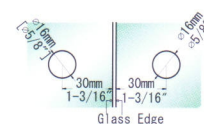

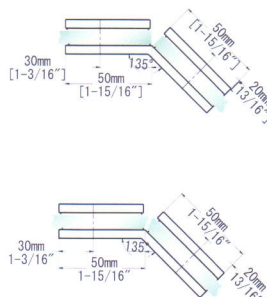

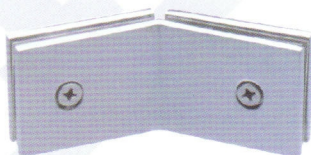

7223

135° Glass to Glass Clamp

To connect two glass panels at 135° angle

Split face outside

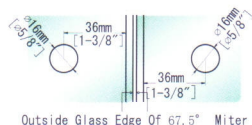

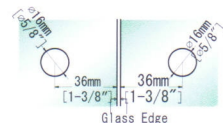

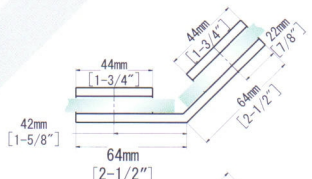

Outside Glass Edge Of 67.5° Miter

7224

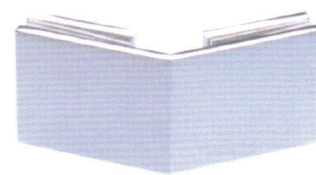

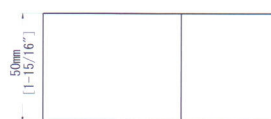

135° Glass to Glass Clamp

To connect two glass panels at 135° angle

Split face inside

Outside Glass Edge Of 67.5° Miter

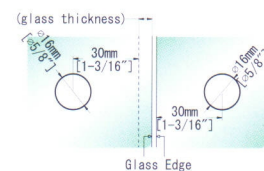

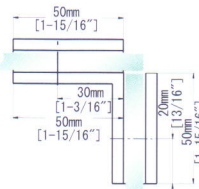

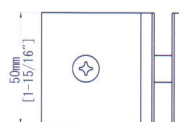

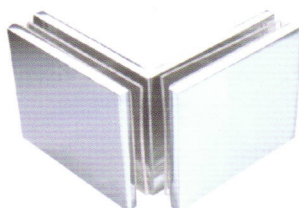

7225

90° Glass to Glass Clamp

To connect two glass panels meeting at 90°

Split face outside

Glass Edge

GLASS CONNECTORS 7400 SERIES

7400 SERIES OF CONNECTORS

This Series of connectors have a specialty of Beveled Edges and Round Corners. 7400 match Jade 700 series of shower hinges.

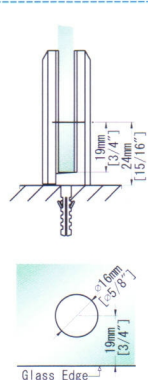

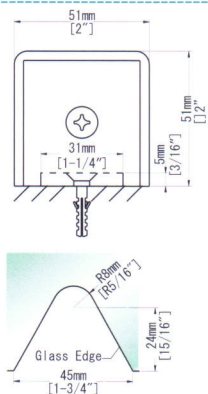

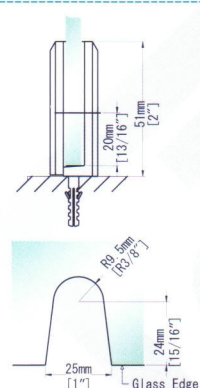

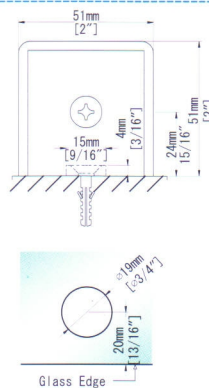

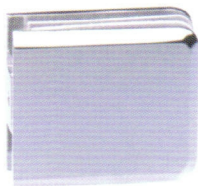

This series include 13 different designs respectively for mounting glass to wall at 90 degree, 135 degree and 180 degree, and for clamping two glass panels that meet at 90 degree, 135 degree and 180 degree.

- **Construction:** Solid Brass
- **Holes Required.**
- **Glass thickness:** 10-12mm (3/8"-1/2")
- **Standard Scope of Supply Includes:**
Gaskets, Self Drilling Screws & Plastic Anchor Bolts for Wall Mount Clips
Extra Gaskets need to be ordered for glass thinner than 10mm (3/8")
- **Standard Finishes:** CP (Bright Chrome), BN (Brushed Nickel), SCP (Satin Chrome), BSCP (Brushed Satin Chrome). AB (Antique Brass), PB (Polished Brass), ORB (Oil Rubbed Bronze), GM (Gun Metal), TI (Titanium), PVD.

Glass to Wall Clip

With One Mounting Hole

7401U

Glass to Wall Clip

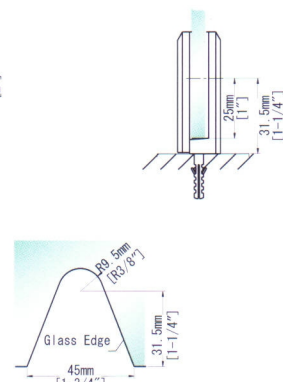

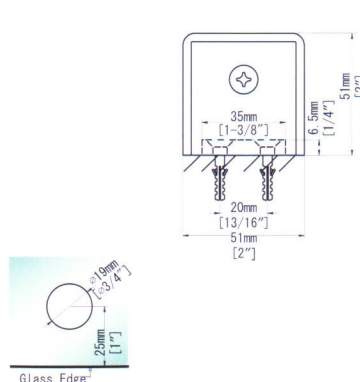

With One Mounting Hole

7402

Glass to Wall Clip, with Two Mounting Holes.

For mounting glass panels directly to the wall, ceiling or floor vertically.

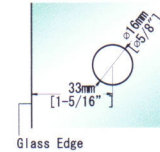

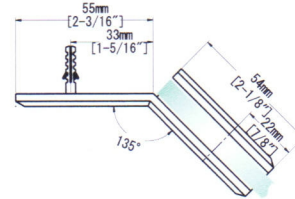

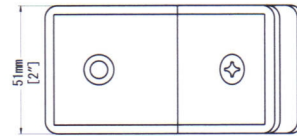

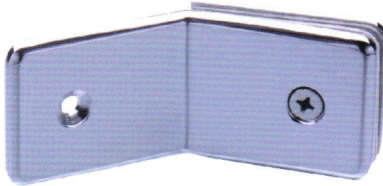

GLASS CONNECTORS 7400 SERIES

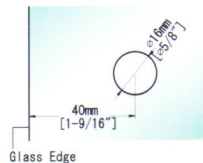

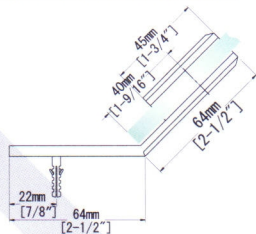

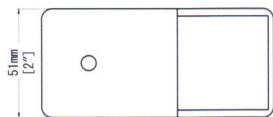

7410

135° Glass to Wall Bracket

For fixing glass indirectly to the wall, floor or ceiling at 135 deg. angle

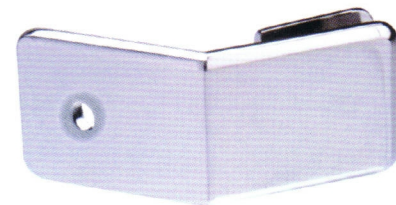

GLASS CONNECTORS
7400 SERIES

7411

135° Glass to Wall Bracket

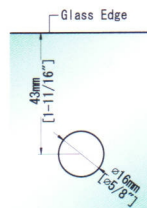

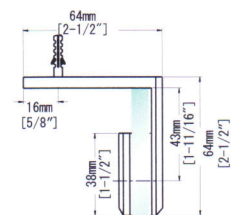

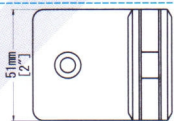

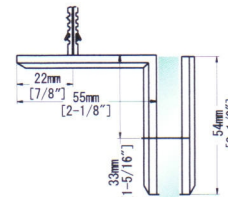

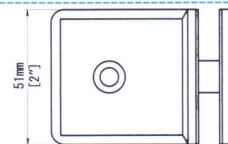

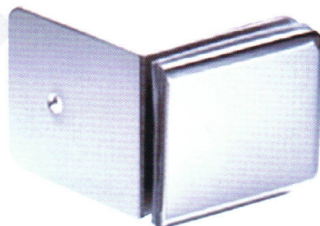

For fixing glass indirectly to the wall, floor or ceiling at 135 deg. angle

7412

90° Glass to Wall Bracket

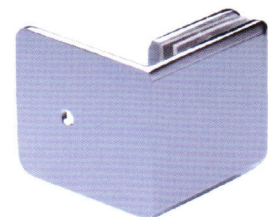

To mount glass panels vertically to the wall, floor or ceiling

7413

90° Glass to Wall Bracket

To mount glass panels vertically to the wall, floor or ceiling

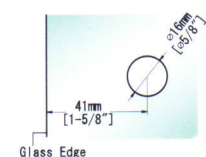

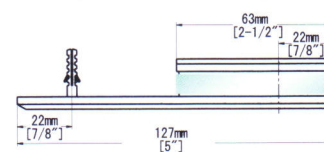

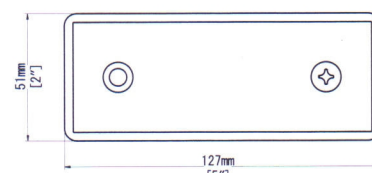

7414

180° Glass to Wall Bracket

To mount glass panels vertically to a step wall or horizontally to the top of a step.

Use as a "Y" clamp.

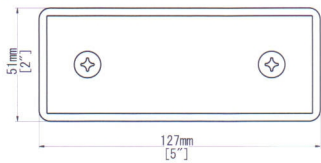

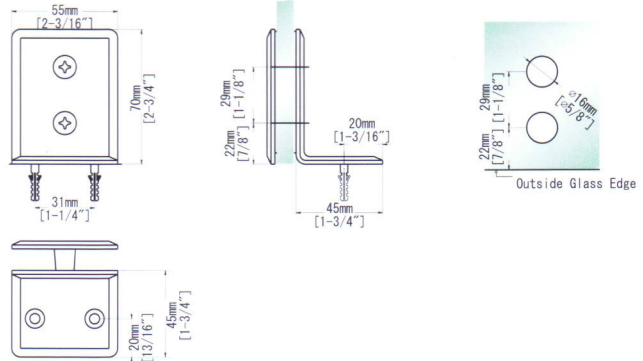

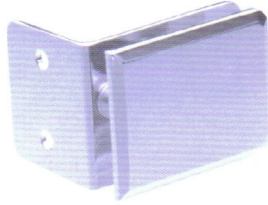

GLASS CONNETCORS 7400 SERIES

7415

90° Glass to Wall Bracket

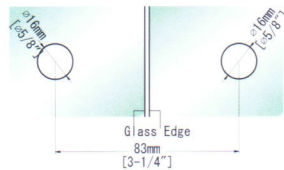

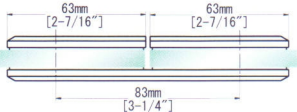

To mount glass panels vertically to the wall,
floor or ceiling
Heavier duty

7420

180° Glass to Glass Clamp

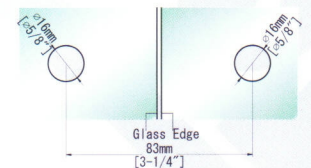

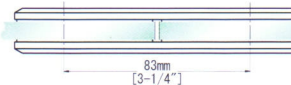

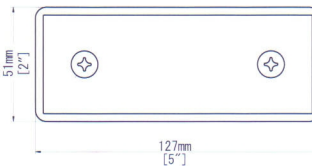

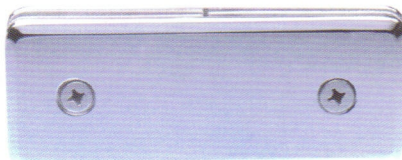

With split face, to connect glass panels inline.

7421

180° Glass to Glass Clamp

With full plate, to connect glass panels inline

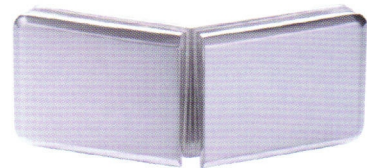

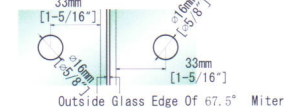

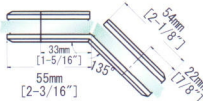

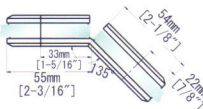

7423

135° Glass to Glass Clamp

To connect two glass panels at 135° angle

Split face outside

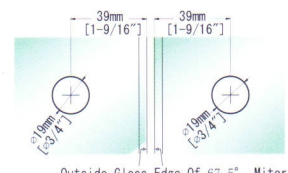

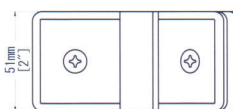

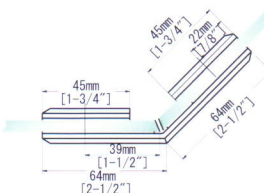

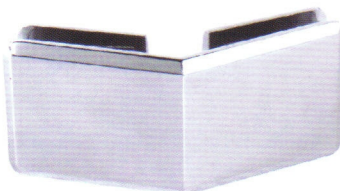

7424

135° Glass to Glass Clamp

To connect two glass panels at 135° angle

Split face inside

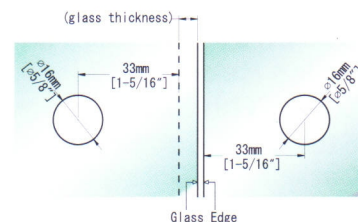

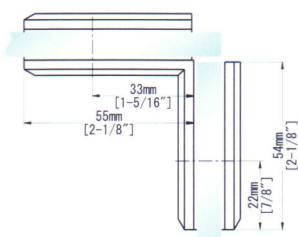

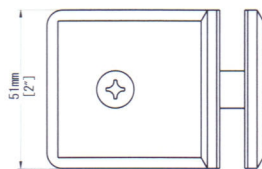

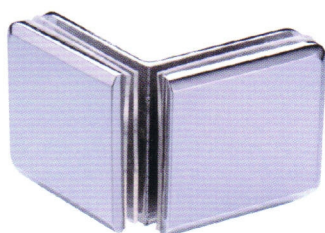

GLASS CONNECTORS 7400 SERIES

7425

90° Glass to Glass Clamp

To connect two glass panels meeting at 90°

Split face outside
